

### TITLE OF THE STUDY

[Title should be short, simple, self-explanatory, and 2-3 words of the title should be in keywords and commonly searchable in Google]

**First Author<sup>1\*</sup>, Second Author<sup>2</sup>**

<sup>1</sup> Affiliation and positions of all the authors, with country name

<sup>1</sup> email of corresponding and co-authors

**Corresponding Author: \***

**Received:**

**Revised:**

**Accepted:**

**Published:**

### **ABSTRACT (words limit 250-300)**

Abstract must document Purpose, Methodology, Findings, Application, and Novelty of study.

**Keywords:** at least 4 to 5.

---

### **INTRODUCTION**

Provide the background of the study in easy words. In this section, the author should discuss the research problem in very clear words. Followed by the motivation of the study. Clear research objectives or questions should be outlined. Provide in-text citations in APA 7<sup>th</sup> edition guidelines style for all the facts that are presented here. [[Easy and Free APA Citation Generator](#)].

### **LITERATURE REVIEW**

Related work of previous researchers should be presented. Minimum 10-15 good and recent works [not older than 5 years]\*, should be presented. This section can be merged with the introduction section as well. Here the author can discuss the research gap that this study is going or willing to cover followed by the hypothesis. [if relevant to their study] Provide in-text citation in APA 7<sup>th</sup> edition guidelines style.

A wonderful guide to literature review is available by University of South California at <https://libguides.usc.edu/writingguide/literaturereview>

### **METHODOLOGY**

Present the materials, methods, survey, questionnaire etc used for the study. The author should explain whether this study is experimental, or review study or simulation-based or survey-based. Discuss software, hardware's used during the study with their brand names. Mention all research conditions,

assumptions, theories followed. This section should be easy enough for any reader to repeat the study under similar conditions. Methodology should be justified with requirements of current study.

### **FINDINGS / RESULTS**

Provide all results with tables, graphs, and images in their original form. Tables/Figures should be placed in the text soon after the point where they are referenced and should be consistent with the main text. Always provide a correct legend to images, tables and graphs. If it is taken from outer source then source must be cited properly.

### **DISCUSSION / ANALYSIS**

Provide logical, and scientific analysis of findings of the study. Present evidences to support your analysis by citing the works of earlier researchers or existing theories.

### **CONCLUSION**

The conclusion should be written in very clear words. It should be able to explain how the objectives of the study are got accomplished.

### **LIMITATION AND STUDY FORWARD**

No study covers all aspects of the research problem. The author should discuss the limitations or gaps of this study. And also present the future scope or plan of the study.

### **CONFLICT OF INTEREST AND ETHICAL STANDARDS**

The author should write in clear words that there exists no conflict of interest with the current organisation and no unethical practices followed during the study. (Like plagiarism, animal testing, human testing etc) In case of any medical report or clinical analysis, a consent letter should be submitted.

### **ACKNOWLEDGEMENT**

The author should present a list of acknowledgements at the end. Any financial or nonfinancial support for the study should be acknowledged.

### **AUTHOR'S CONTRIBUTION**

Provide the contribution of each author in the manuscript.

### **REFERENCES**

Follow APA 7<sup>th</sup> style for referencing and hyperlink all citations with references. See this **video for hyperlinking** <https://www.youtube.com/watch?v=Tt1CF9MJyzw>. Easy and [free software to make your any references into APA 7<sup>th</sup> style](#).
